Interface Pin Function

No.	Symbol	Function																				
1	VCI	Power supply pin for touch analog driving. VCI must be greater than or equal to VDD.																				
2	VSS	Ground pin.																				
3	VCC	Power Supply for Display. Most positive voltage. Connect to external source.																				
4	VSL	This is segment voltage (output low level) reference pin. When external VSL is not used, connect externally to VSS. When external VSL is used, connect with resistor and diode to ground																				
5	DCDCEN0	Enable output pin for external DCDC circuit. NC if not used																				
6	DCDCEN1	Enable input pin for external DCDC circuit. Tie low if not used.																				
7	VDD	Power supply pin for core logic operation.																				
8	FR	This pin outputs RAM write synchronization signal. It should be kept NC if it is not used.																				
9	DCS	This pin is the chip select input connecting to the MCU for display interface.																				
10	TCS	This pin is the chip select input connecting to the MCU for touch.																				
11	RES#	This pin is the reset signal input for display interface.																				
12	TRES	This pin is the reset signal input for touch.																				
13	DC	This pin is Data/Command control pin for display interface. In I2C mode, this pin acts as SA0 for slave address selection.																				
14	E/RD#	In I2C mode, this pin acts as SA1 for slave address selection.																				
15	IRQ	Interrupt signal for touch reporting.																				
16	TD0	Serial Data Input/Output and clock for Touch In SPI mode TD2 serves as SDOOUT, TD1 serves as SDIN, and TD0 serves as the serial clock SCLK.																				
17	TD1	In I2C mode TD2 and TD1 should be tied together and serve as SDA and TD0 is the serial clock SCL. External pull up resistors.																				
18	TD2																					
19	VSS	Ground pin.																				
20	D0	The serial clock input for display interface.																				
21	D1	The serial data input for display interface.
